LITTLE DOUBT BUT PLENTY OF SPACE WILL BE SOLD.

With All the Spaces and Concessions Sold the Committee Would Have a Mouthly Revenue About Double the Estimated Expenses.

The manufacturers are going to take the space in the proposed permanent exhibit rapidly, judging from the experience of Secretary Winsborough yesterday, Though the circular to members asking them how much space they would want were only mailed at 11 o'clock, Thursday, it was not yet 3 o'clock of the same day when two replies had been received. One man, in order to announce his choice of space early. sent his reply in by special messenger. He had the honor to be "No. 1" on the list of replies received. The method of distributing the spaces has not yet been decided but some plan will be arranged which will be equitable and fair to all.

The committee stated in its circular to members that for the best spaces, espeoffily on the lower floors, it was likely that competition would be excited either by letting the spaces at auction or receiving stated bids for them. One of the members who responded yesterday said he was willing to pay a good price for a space on the lower floor, and he thought these spaces should be sold at auction. He believed this plan would bring more money to the association and would be more satis factory to the members. He said that for himself he would like to be alongside of other exhibitors who manufactured the same line of goods and he felt the majority of the manufacturers felt the same With several exhibits of the same class adjoining each other a better showing for the city in that line would be the result. It would have a greater effect on the mind of the stranger than to see the

result. It would have a greater effect on the mind of the stranger than to see the same amount, or even more, scattered through the building and isolated. Besides, with a lot of exhibits of one kind in close proximity all visitors who contemplated buying anything in that particular line would be at once attracted to that portion of the building and each individual exhibitor would then see more of the people desiring goods in his line than if he were by himself.

With the plan of selling the spaces at auction each bidder would know who his neighbors would be and different exhibitors desiring to locate near together could thus arrange the matter. If the spaces were let by sealed bids, said the member, all these advantages might be lost.

One man who has given the permanent home product show considerable thought predicts that the business which it brings to the manufacturers will be so great that if will not be long until the exhibitors will want more attendants than is provided for under the plan of the committee. He thinks it will not be long until several exhibitors will club together and hire a man to pay special attention to their booths and that before the show is running many months many of the large exhibits will have attendants constantly on duty many months many of the large exhibits will have attendants constantly on duty and devoting their entire time to showing up and taking orders for the goods made by the exhibitor for whom they are work-ing. When that time comes, he says, the home product show building will not only be a busy place, but it will do lots of busi-

ness for the manufacturers.

The circular which the committee sent out contained, besides the plats of the four floors, a list of the prices fixed by the com-mittee for the various booths. These lists show for the first floor seven booths at \$25 each, eighteen at \$30 each and eighteen at \$15 each. For the second floor there are nine spaces at \$12 each, thirteen at \$16 each and twenty-seven at \$8 each. On the third floor there are ten spaces at \$5 each, fourthere are ten spaces at \$5 each, four-teen at \$4 each and twenty-seven at \$3 each. If all these were disposed of at the prices fixed it would give a monthly rev-enue of \$1,446, besides what can be secured for the refreshment concession, which would make a total of about double what the committee estimates the running ex-

committee estimates the running expenses will be. This would allow a large margin for contingent and unexpected expenses, as well as providing a good fund with which to get up something special in the way of attractions to draw crowds to the building and increase the interest—to "have a circus day every month in the year," as President Dickey expressed it at the meeting the other night. The one thing necessary to make the permanent show pay the manufacturers is to get lots of people there and occasional special features would help in this immensely. The women's reception rooms and the reading and smoking rooms are also things which are calculated to make the place a popular headquarters.

If the committee adopts the plan of sell-If the committee adopts the pian of selling some of the choice spaces at auction it is probable no bid will be accepted for any space which names a less figure than the one agreed upon by the committee as the price. The auction would, therefore, be certain to give an increased revenue over what will be secured if all the spaces are sold without competition of any kind.

It up, but it had such a mastery over me that I became sick and distressed and would return to it, which is exactly the way with any stimulant like coffee or whisky, and it marks such an article as a slave thereto.

I was subject to periodical sick spells at the stomach, dizziness in the head, and cross and fretful mornings. About six months ago I began to use Postum Cereal Food Coffee, and I have not had a sick spell since, no dizziness, and I feel as cheerful and calm as a good Christian ought to feel. I am greatly improved in health and am growing stout.

am growing stout.

I am so delighted with the Postum that I recommend it to everyone who comes to our table, and some who do not. A short time ago, a relative visiting us from Coltime ago, a relative visiting us from Col-umbia, Ga., was served with a nice hot cup at breakfast, without being told that it was Fostum Food Coffee. After break-fast I asked him how he liked our coffee. He said he liked it better than any cup of coffee he had ever drank, for it had a flutle peculiar taste that fitted his palate perfectly. He wanted to know what brand we used, and I told him it was Postum Food Coffee, no berry coffee at all. He could not be persuaded that I was not teasing him until I got the package and showed him all about it. He bought quite a little to take home to his family. You may depend upon it that the cup he

a little to take home to his family.

You may depend upon it that the cup he had was well made, and I am very particular to know that Postum is boiled, for that is a thing that coffee users have to learn. They cannot make Postum by a little simmering, as they formerly made coffee. You can always tell whether it has been boiled long enough by the taste. If it is rich, strong and good, it has had boiling enough to bring the taste out. If it is not, it had only been on the stove a short time.

RESERVOIR EMPTIED. Workmen Caught 150 Pounds of Cat

and Buffalo Fish-The Basin Will Be Repaired. The big Holly street reservoir was emptied last week for the first time in eight years and in the ten inches of mud on the bottom of the basin the workmen employed in cleaning culled 150 pounds of

cat and buffalo fish. The work is preparatory to putting the basin in complete repair. The cement bottom was found in excellent condition and only needed patching in a few places. For a distance of fifteen feet up the side the walls were also all right and very soon water will be run into the basin again until it is full to a depth of about twelve feet. All the riprapping, that extends down from the top for a distance of ten feet, will be removed and replaced with concrete to within five feet of the top of the basin, and from there on vitrified brick will be laid on end. The top wall will be of brick, capped by a brick coping. All this can be done after the basin is partly refilled, so that the work will not interfere with the use of the reservoir. The leak in the riprap, that had existed for years, was found to be about six inches in diameter and was plugged up with concrete and cement. water will be run into the basin again un-

TENANT WILL NOT GO

The entertainment committee having in HOW TO BEAT A LANDLORD OUT OF RENT MONEY.

> Obstinate East Side Renter Refuses an Offer of \$150 to Move-In Peaceable Possession of Uis Leasehold.

How long may an obstinate tenant occupy a house against his landlord's will? Attorney Porter B. Godard is trying to find an answer to this question. Of course it depends upon the statutory law governing landlords and tenants, and from a vexing experience that he is now in the midst of experience that he is now in the midst of Mr. Godard has concluded that the law gives the tenant entirely too much advantage over the landlord.

Mr. Godard has a tenant in the Quinlan block, on East Eighth street, of whom he would give a great deal to get rid. The tenant is \$150 in arrears and is still enjoying peaceable possession. It is no longer a question with Mr. Godard of getting the \$150. It is a question of ejecting the tenant, so as to replace him by one who will pay his rent. Mr. Godard has even offered to give the tenant the \$150 now due if he will move. But no. The tenant knows that by reason of the law's delay he can remain where he is at least three or four months yet, and then be out nothing for shelter. So he calmly but firmly stays

"That," said Mr. Godard, "is the only recourse a landlord has and I have sued." Then he recounted the long series of vexatious delays that a tricky tenant may avail himself of in the justice court. A change of venue was taken to Independence. This consumed a month. There the case was found to be defective in some way and was dismissed and brought over again—another month. Then, before Justice Spitz, the tenant made affidavit that the title is theological and a spectrum taken the title is involved in an ejectment suit a justice court has no jurisdiction. The suit must be tried in the circuit court. If affidavit is made, whether it is true or false cuts no figure, the case must go to the higher court. This takes at least three months and may take six or eight months. Meanwhile the tenant is enjoying undisturbed possession of his "freehold."

Such is the sad situation at the Quinlan block.

MAY SELL THEIR TIME. Justice Walls Decides as to City Employes' Rights-May Assign It to Anybody.

The city ordinance against time selling by city employes was knocked out yesterday in the case brought May 3 before Jus-tice Walls to collect \$24.04 from the city on assigned warrants. The suit was brought against the city by Clarence Palmer for the Kansas City Loan Guaranty Company to collect the cash on four warrants as signed to the company by J. W. Carson P. H. Mclvett, P. Anderson and Walter S Boheon, the city having refused to honor the warrants because the men themselves did not appear to sign the warrants, as required by the Batt ordinance. Counselor Middlebrook, who appeared for the city. argued that the passing of the ordinance made its terms a part of the contract under which every city employe worked, and that

which every city employe worked, and that any violation of the ordinance annulled the contract; that the men, by assigning their pay before it was collected, had forfeited their claim to it.

Mr. Palmer, the attorney for the loan guaranty company, claimed that the ordinance, if upheld, would abridge the constitutional right of citizens to dispose of their own property as they see fit; that the men had earned the money, and had a claim against the city which they could order paid to whom they wished.

Justice Walls in his decision coincided with the views of Attorney Palmer that the men, having performed the labor for which the money was to be paid, had a which the money was to be paid, had property right in it, and could transfe heir claims just as they could any per city will appeal the case to the cir-

Shade of the Murdered Woman Said to Haunt the House She Lived In.

Evansville (Ind.) Cor. Chicago Inter Ocean.

The ghost of Mrs. Mary Ann Starck, who was mysteriously murdered here severa days ago, has been heard by several perons, whose veracity is unquestioned, for three nights in succession. The occupants of Mrs. Starck's home declare that they can hear her cries for help every night. The ghost disappears when-ever approached and refuses to talk to any one. Many persons say they can hear a noise which sounds like footsteps and the
